

VIVO ENERGY ENVIRONMENTAL POLICY

Mission statement

Vivo Energy recognises that it has a responsibility towards the environment beyond legal and regulatory requirements. We are committed to reducing our environmental impact and continually improving our environmental performance as an integral part of our business strategy and operating methods. We will encourage our partners, customers, suppliers and other stakeholders to do the same. This supports the Groups' vision to become the most respected energy company in Africa.

Responsibilities

The Head of Health, Safety, Security and Environment shall be accountable for implementing the environmental policy across the Group. Senior management are committed to ensure that the minimising of our environmental impact is a key consideration in all our business dealings. The Operating Unit Managing Directors are responsible for the implementation of the policy and standards within their respective Operating Units. All employees have a responsibility in their place of work to ensure that the aims and objectives of the policy are met.

Policy aims

Vivo Energy will continue to strive to:

- Assess the environmental consequences of its operations on the local environment.
- Comply with and exceed, where possible, all relevant regulatory requirements.
- Operate in a safe manner to avoid spills, leaks or accidental discharges of polluting materials.
- Continually monitor environmental performance.
- Limit the quantities of wastes and other discharges.
- Maintain pollution contingency plans and the capability to respond in an emergency.
- Incorporate environmental factors into business decisions.
- Monitor, record and report emissions and on the use of energy as required by law. KPIs will be set to ensure the Group actively strives to reduce its impact on the environment.
- Assess and prioritise the energy consumption and efficiency of new operations, sites and products when developing, designing and purchasing them.
- Promote products and technology that supports the Groups environmental aims.

Respect our environment by:

- Practising and promoting the principles of Reduce, Reuse, Recycle and Recovery.
- Promoting cleaner and more efficient fuels and lubricants through our business channels.
- Providing access to LPG where possible to replace carbon intensive fuels.
- Utilizing renewable technologies in our operations and as energy solutions to our customers where possible.
