

Powering Your Mining Operations

Across 28 African markets, Vivo Energy brings together premium fuels, advanced lubricants and chemicals, and in-country technical expertise, supported by our shareholder Vitol's global logistics network.

Our goal is simple: to help mines operate safely, efficiently, and profitably.

End-to-end energy solutions that drive results

High quality fuels

Our Shell and Engen fuels are designed to deliver consistent performance in demanding mining environments. With reliable supply, controlled quality, and local technical support, our fuels help optimise engine efficiency, reduce downtime, and keep critical mining operations running smoothly.

Lubricants for maximum uptime

We supply Shell and Engen lubricants engineered to protect critical components, extend equipment life, and reduce maintenance costs. Proven in extreme operating conditions, our lubricants support sustained equipment protection, enabling higher productivity and more predictable performance.

Digital performance insights

Vivo Energy's digital solutions, such as Continuous Equipment Monitoring (VE CEM) and Oil Condition Monitoring (VE OCM), deliver visibility into equipment performance and fluid and asset health. These insights enable predictive maintenance and help reduce unplanned downtime.

On-site technical support

Technical specialists work alongside mining teams to conduct site surveys, training, and performance reviews. This ensures that every solution delivers measurable operational improvements and tangible value.

Integrated supply chain strength

Backed by Vitol's global logistics network, we ensure product consistency, reliable availability, and secure delivery to even the most remote mining sites.

Supporting every stage of the mining value chain

From pit to plant to port, Vivo Energy provides tailored solutions that help mining companies increase output, reduce operating costs, and maintain safe and efficient operations.

Tools that elevate performance

Tool	Purpose	Key benefits
Vivo Energy Continuous Equipment Monitoring (VE CEM)	Predictive equipment monitoring	Faster decision making, reduced downtime, lower costs, improved efficiency
Vivo Energy Oil Condition Monitoring (VE OCM)	Lubricant and component health monitoring	Increased uptime, extended component life, reduced maintenance costs
Fuel management systems	Real time fuel usage control	Better consumption visibility, reduced waste, improved cost control
Lubricant management programmes	Correct product application and usage	Higher efficiency, reduced failures, optimised lubricant performance
Vivo Energy Value Improvement Process (VE VIP)	Operational optimisation and cost improvement	Identifies savings, improves productivity, delivers measurable gains
Vivo Energy fuel and lubricant filtration solutions	Provide ultraclean fuels and lubricants at the point of dispensing	Significantly improved equipment component life, reduced maintenance requirements, mitigated OEM fluid requirements and improved fuel efficiency
Vivo Energy Lube Room solutions	Provide clean, fit-for-purpose lubricants in a clean and controlled environment	Improved fluid control, cross contamination mitigation, limit lubricant losses and improved equipment life

Additional products and solutions

Chemicals solutions

High-performance processing and water-treatment chemicals that improve extraction efficiency, reduce losses, and support safer site operations. As Vivo Energy, we market kerosene-based and gas-to-liquid (GTL) solvents used as diluents in the solvent extraction process for recovering metals such as copper, cobalt, nickel, uranium, zinc, and manganese.

Our diluents are designed and engineered for optimal extraction performance and are characterised by low viscosity, high flash points, and low evaporation rates. Vivo Energy's diluent portfolio has consistently delivered superior operational efficiency and supported high extraction rates, all while maintaining the highest safety standards.

SwissPIR

Flow-enhancing chemistry that increases densities in conjunction with improved pumpability to increase throughput, reduce energy use, and lower operating costs in slurry and product transfer processes.

Why mining companies choose Vivo Energy

Mining companies partner with Vivo Energy because reliability and performance matter.

Customers benefit from:

- A Pan-African presence with local expertise and global reach
- Shell and Engen world class fuels, lubricants, and chemicals
- A dependable and resilient supply chain
- Technical support that delivers real operational results
- A trusted partner who helps optimise asset and maintenance strategies to reduce total cost of ownership and increase production

Customer value proposition: Delivering savings and innovation

Operational excellence redefined:

<p>High-performance, energy-efficient lubricants, including engine, axle, transmission, hydraulic and gear oils and greases</p> 	<p>Chemicals & special products</p> 	<p>Health, Safety, Security, Environment and Quality (HSSEQ)</p>
<p>On-site support: Consignment stock Vendor managed inventory assets Fuel / lubrication management systems</p>		<p>Total cost of operation (TCO) programmes</p>

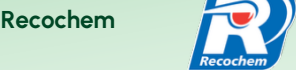

Sustainability & decarbonisation:

<p>Environmentally friendly products</p> 	<p>Energy efficient improvements</p> <p>Carbon compensated lubricants</p> <p>Waste oil management</p>

Partnership for future growth:

<p>ESG & local content</p> <ul style="list-style-type: none"> · Corporate social investment initiatives in partnership with customers · Localisation & enterprise development 	<p>Renewables & energy solutions</p> <ul style="list-style-type: none"> · Renewable energy · Biofuels · Hydrogen · Nature-based solutions
	

*Engen EcoDrive only available in Rwanda.

Who we are

Vivo Energy is a market leading, pan-African retailer of high-quality Shell and Engen-branded fuels and lubricants. We source, distribute, supply and market these products to retail and commercial customers across Africa, keeping the continent on the move.

We are present in
28 African markets

We export lubricants
To an additional 10+ markets

We are a mining market
Leader in Africa
